Open Cancel Done

# When Done...

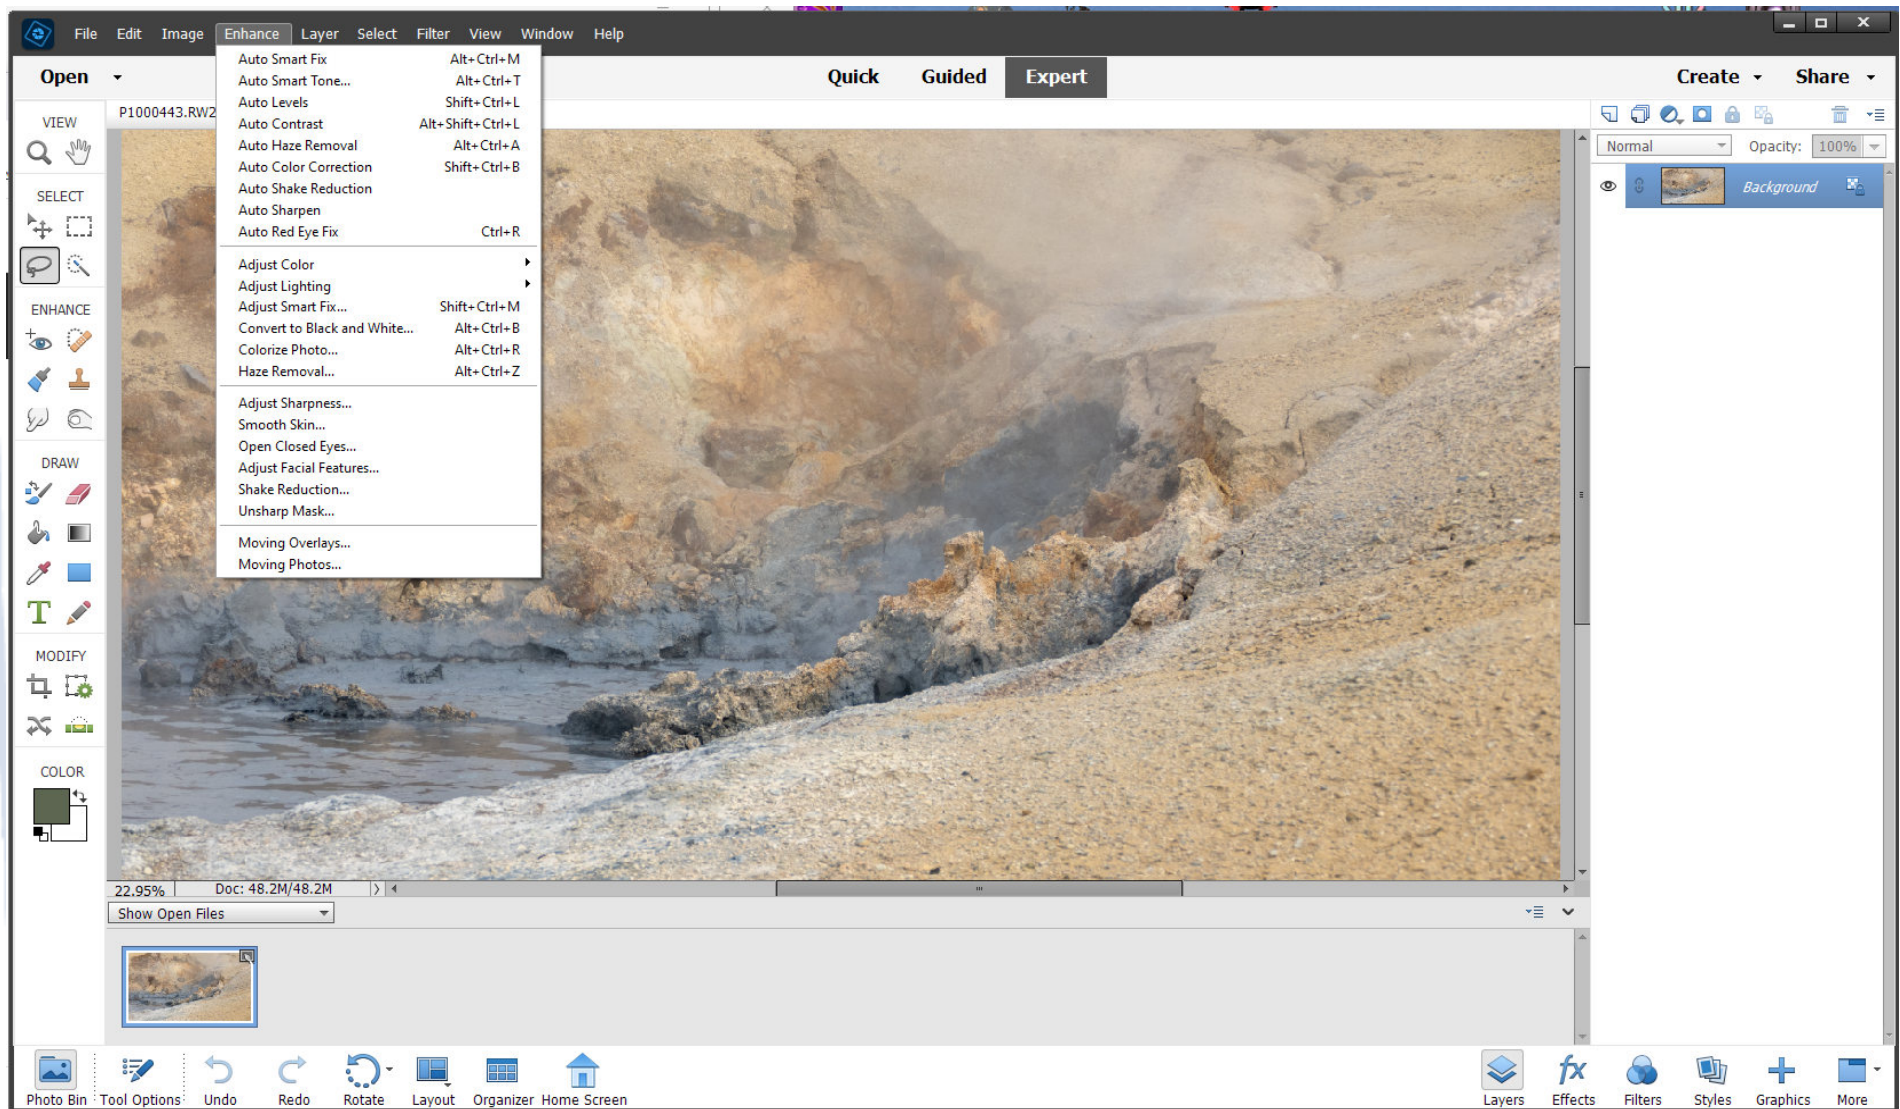

**OPEN** –  
applies  
changes,  
creating  
.xmp file,  
and opens  
image in  
rest of  
Elements

**CANCEL** –  
cancels  
changes and  
closes image

**DONE** – applies changes, creating .xmp file,  
and closes image

# Other Ways to Adjust Color

# Basic Color Adjustments in Topaz Studio 2

Studio 2 can open RAW files, probably uses camera profiles.

- Other Topaz products such as DeNoise use camera profiles
- Once you have decided on filter settings for your camera, that set of settings can be saved as a Look, Studio 2's equivalent to a preset

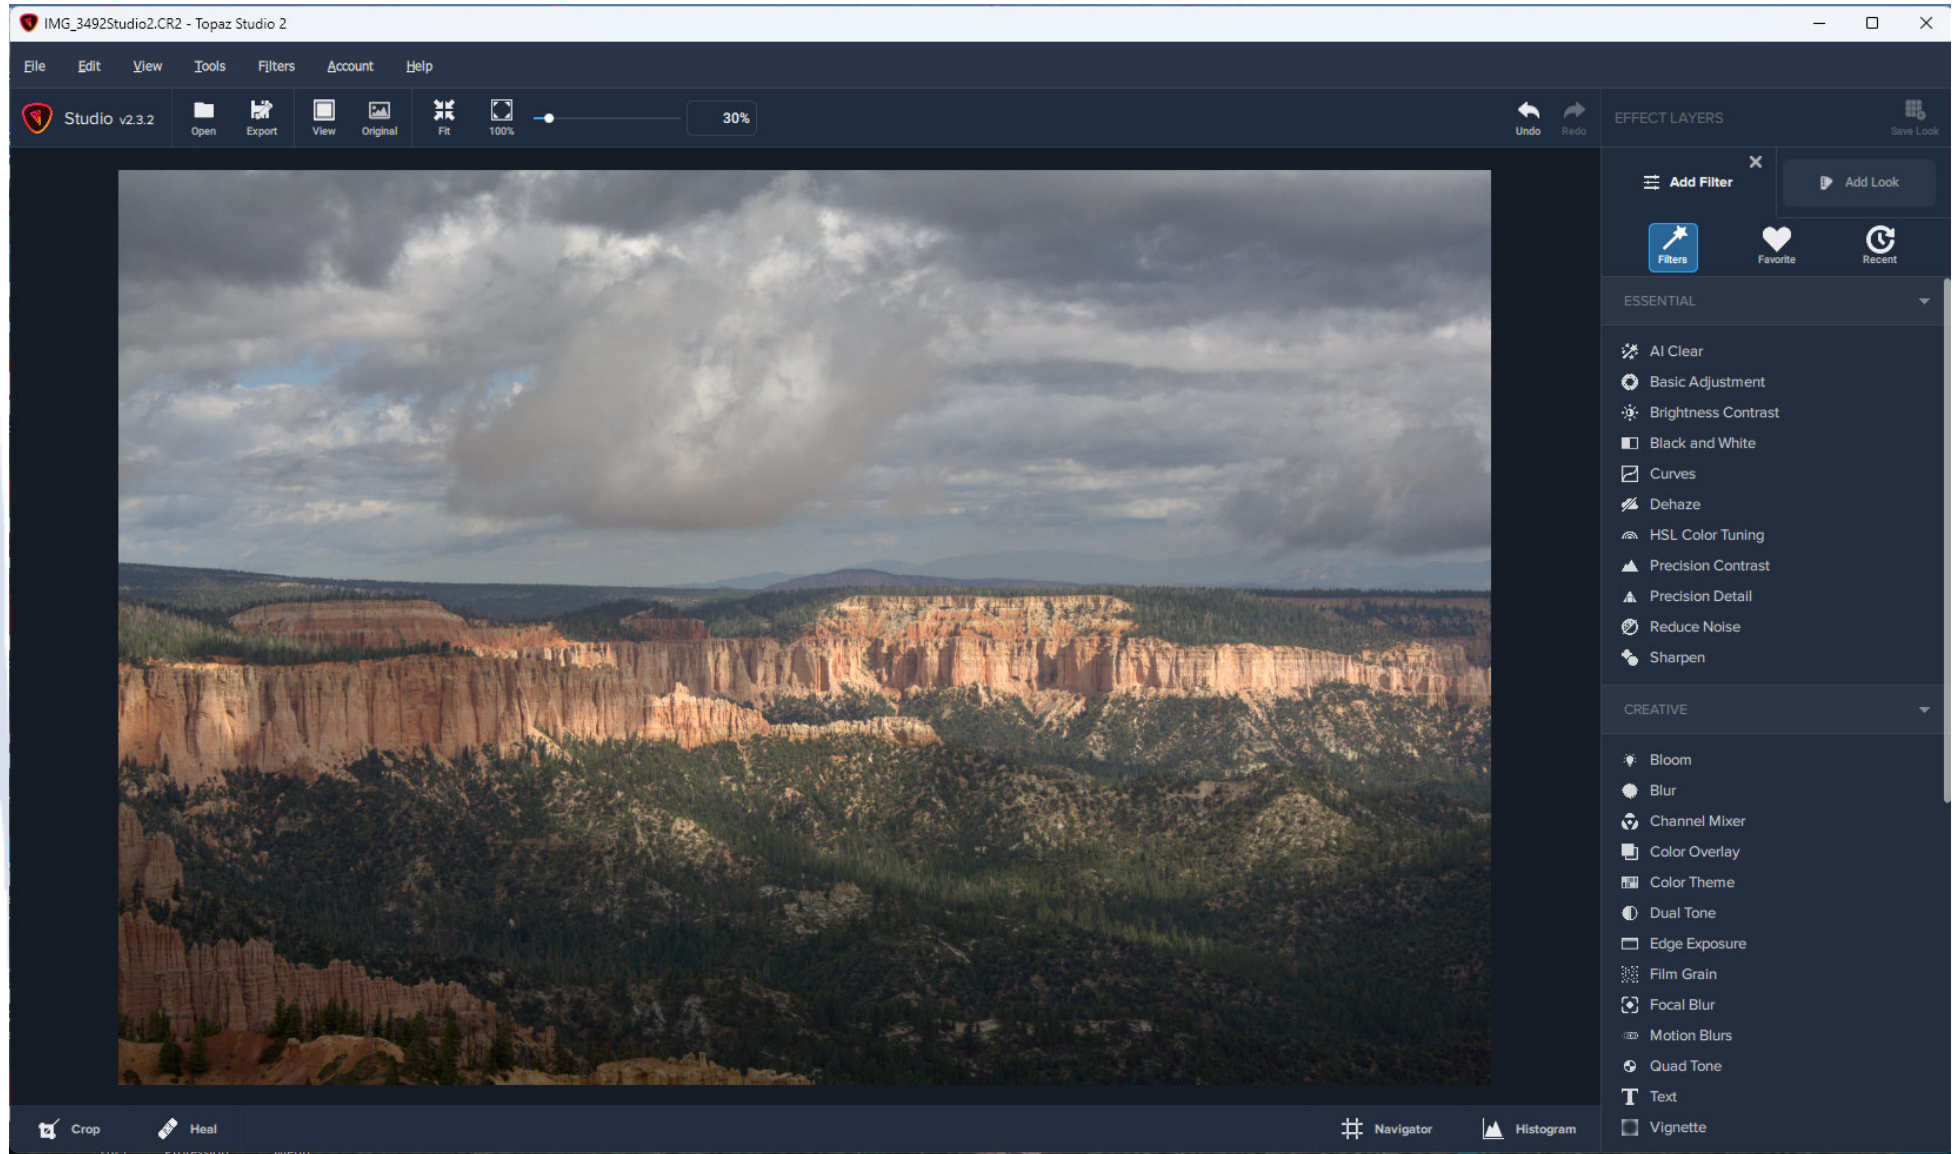

Studio 2 Basic Correction filter has most controls that ACR has

Other filters exist for HSL, curves, dual tone (split tone), dehaze, etc.

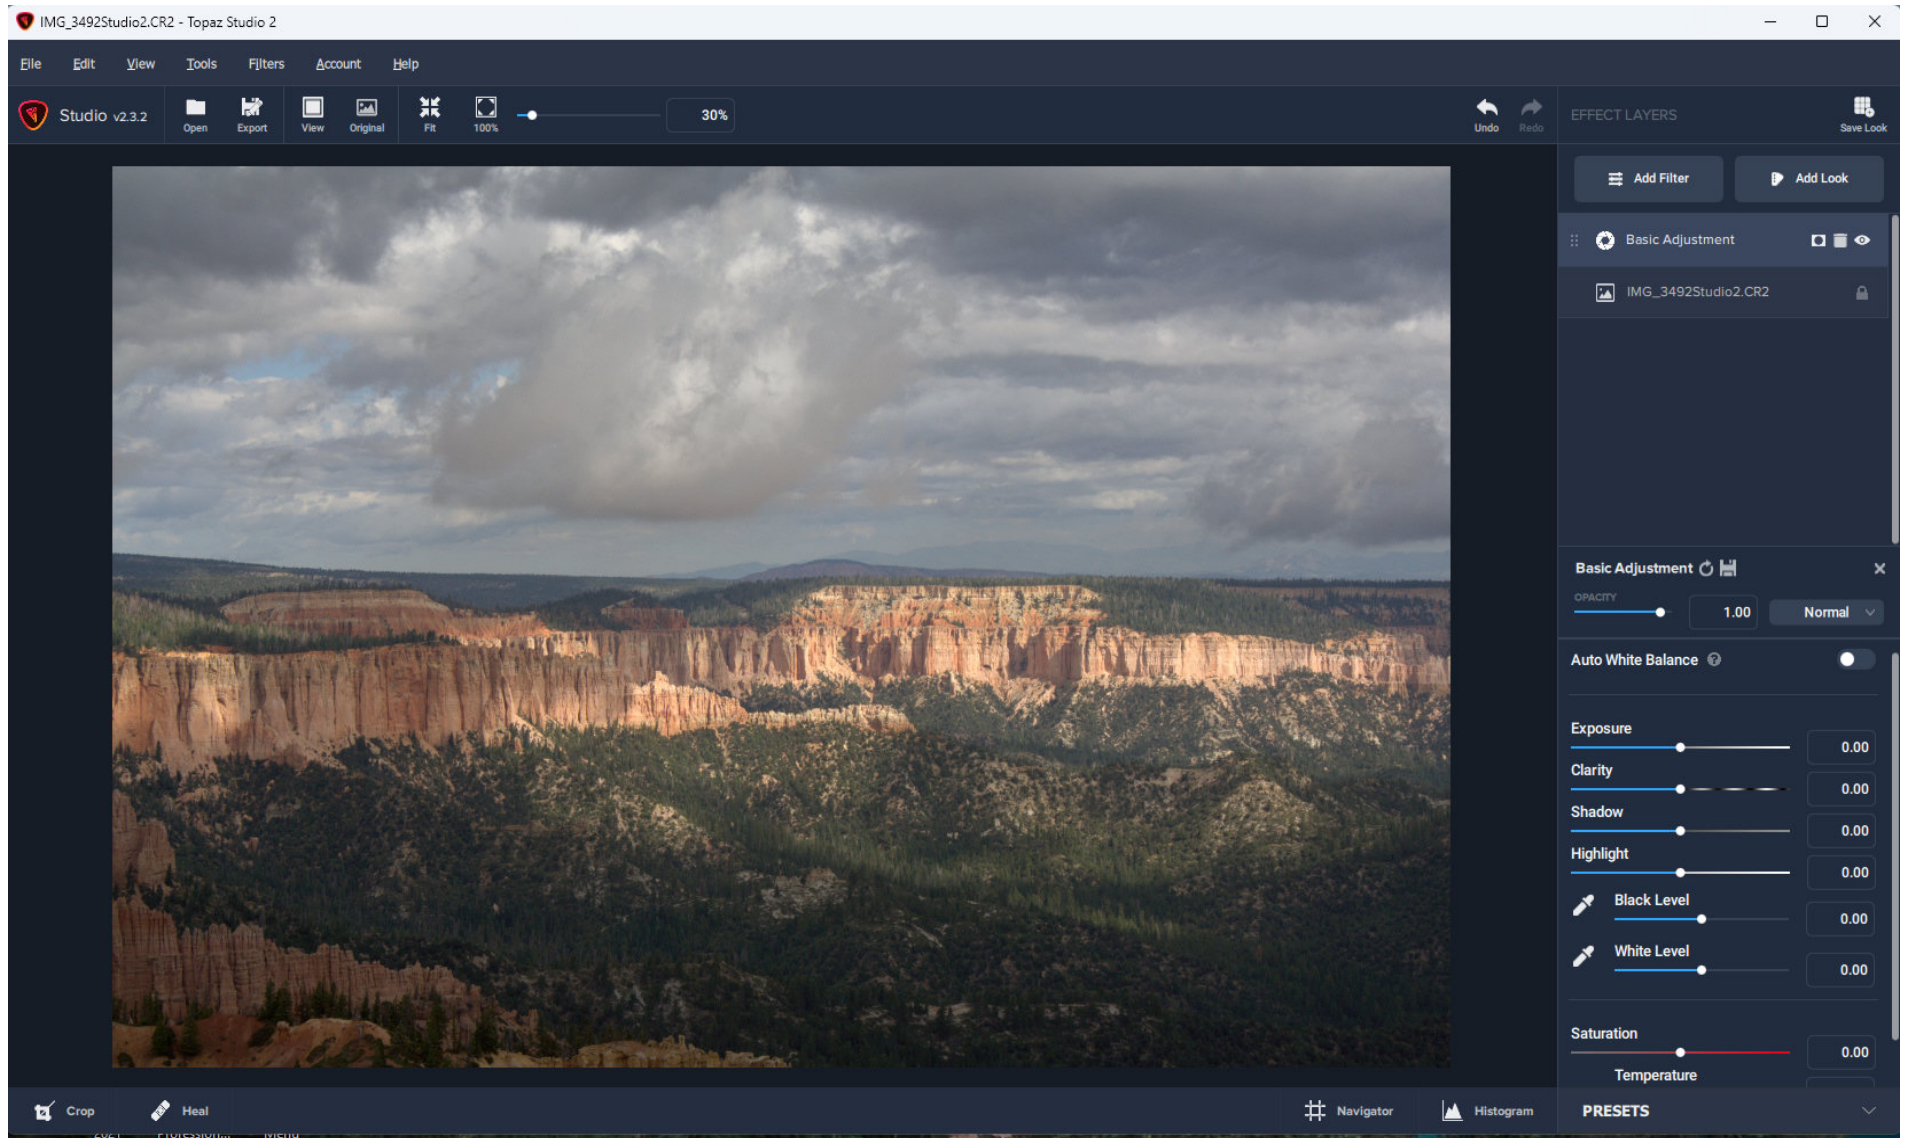

All Topaz products, including Studio 2, can be used as plugins in Photoshop, Lightroom, and Elements
